README.md

Hey, this is us

Yes, we are building GitHub on GitHub. In fact, we've been doing this since **October 19th, 2007**. That's when we made our first commit. Since then we pushed **over 2.5 million commits**, opened **over 1 million issues**, submitted roughly **650k pull requests** across **4357 repositories** from over **50 countries**. But that's just us. We are proud to be part of the work of millions of developers, companies and robots across the solar system. Yes, [Robots!](#)

An interconnected community

The open source community is the heart of GitHub and fundamental to how we build software today. See for yourself:

- [GitHub Sponsors](#) helped support more than **5k** individuals and projects around the world
- Open source projects on GitHub received a stunning **218 million** contributions in the last year alone
- **Every minute** a developer creates a new release for a public project on GitHub

Now that we are talking about the important things, are you contributing to open source? Yes? Okay, you rock! If not, we can help you get started! Open source software is made by people just like you. Learn more about [how to contribute](#).

Contributing to the ecosystem

We contribute to the tools we rely on to build and run GitHub, while also maintaining our own open source projects like:

- [GitHub CLI](#) - A command line tool for GitHub
- [Git Large File Storage](#) - A git extension for versioning large files
- [Primer](#) - The GitHub design system

Appendix

See what's next on our [public roadmap](#) and [let us know](#) if you have any suggestions. Oh, and by the way, we are always hiring talented, passionate people to [join our team](#).

"Tell me more, I can't get enough!"
